RIFF JTAG Error codes and troubleshooting
# WARNING: Erasing Error (0x24)

2.4. Error code 0x24

Returned by the DCC Loader when it fails to erase flash memory's logical block. **This is not an abnormal situation for NAND memories** – bad blocks are sometimes appear due to specific NAND memory's technology. User shall select how to handle block erase error in the JTAG Manager – for this user must be familiar with bad blocks handling techniques in general.

Solution:

Set up bad blocks handling method in Box Service -> Advanced settings:
